

Extended care, on real infrastructure.

One platform for enrollment, waitlists, attendance, billing, and reporting. Built on Salesforce for publicly accountable school boards and education authorities.

Live

With public-sector school boards

100%

Salesforce-native platform

Region

Configurable data residency

SOC 2

Enterprise security via Salesforce

● The challenge

- × Waitlists in spreadsheets — manual sorting, no audit trail
- × Disconnected systems — enrollment, billing, attendance live apart
- × No board-wide visibility — leadership can't see across schools
- × Paper forms & clunky portals — families lose trust in the process
- × Compliance gaps — documentation scattered, hard to defend

● The Kaya approach

- ✓ Rules-based enrollment — automated prioritisation, full audit history
- ✓ Integrated operations — enrollment tied to attendance and billing
- ✓ Board-wide dashboards — every school, one view, in real time
- ✓ Modern parent portal — mobile, self-service, transparent
- ✓ Full audit trails — role-based access, defensible under regulatory review

WHAT YOUR BOARD GETS

Enrollment & waitlist control

Policy-aligned placement with configurable priority groups, time-windowed enrollment, and automated offer cascade. Every decision documented.

Attendance & site oversight

Real-time check-in and check-out, capacity monitoring, and cross-site visibility across all programs and locations.

Financial accountability

Billing tied to enrollment and attendance. Pro-rated adjustments. Zero manual reconciliation at month-end.

Governance readiness

Role-based access, board-level reporting, structured audit trails. Defensible under regulatory review from day one.

TWO PORTALS, ONE TRUTH

Parent Portal

FOR FAMILIES

- Account creation & setup via email invite
- Child onboarding — name, date of birth, school
- Program enrollment filtered by grade & school
- Waitlist status & automated offer acceptance
- Withdrawal with notice-period handling
- Fully mobile-responsive — any device

Administrative Back End

FOR YOUR TEAM

- Full data management with field-level tracking
- Report generation & program configuration
- Waitlist processing with priority algorithm
- Audit trails on every record modification
- Chatter messaging on student & parent records
- Role-based field access per staff position

PLATFORM & COMPLIANCE

Salesforce-native

- Built on Salesforce — no middleware or integrations
- Inherits Shield encryption & event monitoring
- Role-based access at field level
- Scales from pilot to multi-board deployments
- Salesforce AppExchange — in review

Data governance

- Configurable data residency to meet jurisdictional requirements
- Privacy controls for minor and family data
- Governance structures to support regulated programs
- Complete audit trail with role-based field access
- Sandbox → UAT → Production governance

PACKAGES

Kaya Essentials

5-15 SCHOOLS

Full platform, business-hours support, all product updates.

Kaya Standard

16-40 SCHOOLS

Advanced dashboards, quarterly reviews, annual customisation sprint.

Kaya Enterprise

40+ SCHOOLS

Dedicated customer-success manager, quarterly business reviews, multi-board architecture.

See Kaya in action.

Book a 30-minute walkthrough tailored to your board's operations. We'll show you how Kaya fits with your schools, your programs, and your compliance requirements.
